

**MARUTHI SCHOOL OF BANKING**  
**IBPS PO-V MANI EXAM - COMPUTER KNOWLEDGE**

**1. Anything written on the screen is called**

1. Cursor                      2. Text                      3. Folder                      4. Boot                      5. none of these

**2. A Web site address is a unique name that identifies a specific \_\_\_\_\_ on the Web.**

1. Web browser              2. PDA                      3. Web site                      4. Link                      5. None of these

**3. Every component of your computer is either \_\_\_\_\_**

1. Hardware or software                      2. Software or CPU/RAM  
3. Application software or system software              4. Input devices or output devices                      5. None of these

**4. Which of the following is an Operating System?**

1. MS Windows              2. Mac                      3. MS DOS                      4. Windows NT                      5. All of the above

**5. A terminal that cannot process any information is called**

1. Direct access terminal    2. Intelligent terminal    3. Smart terminal              4. Blind terminal              5. Dumb terminal

**6. The keys labelled 0-9 on the keyboard are called \_\_\_\_\_**

1. Function keys              2. Numeric keys              3. Typewriter keys              4. Special keys              5. Alpha keys

**7. In a spreadsheet, a cell is defined as the**

1. Intersection of a table and a tuple              2. Intersection of a file and a database  
3. Intersection of a row and column                      4. Intersection of a field and a record                      5. None of these

**8. The basic goal of a computer process is to convert data into \_\_\_\_\_.**

1. Information              2. Tables                      3. Files                      4. Graphs                      5. None of these

**9. Dumb terminals have terminals and \_\_\_\_\_.**

1. Mouse                      2. Speaker                      3. Keyboard                      4. Mouse or Speaker              5. None of these

**10. \_\_\_\_\_ is when the more power-hungry components, such as the monitor and the hard drive are put in idle.**

1. Hibernation              2. Power down              3. Standby mode              4. The shutdown procedure              5. None of these

**11. A \_\_\_\_\_ typically connects personal computers within a very limited geographical area, usually within a single building.**

1. LAN                      2. BAN                      3. TAN                      4. NAN                      5. None of these

**12. A(n) \_\_\_\_\_ camera is a peripheral device used to capture still images in a digital format that can be easily transferred into a computer and manipulated using graphics software.**

1. Digital                      2. Analog                      3. Classic                      4. Film                      5. None of these

**13. \_\_\_\_\_ makes it possible for shoppers to make purchases using their computers.**

1. E-world                      2. E-commerce              3. E-zone                      4. E-business                      5. None of these

**14. A word in a web page that, when clicked, opens another document is called \_\_\_\_\_**

1. Anchor                      2. Hyperlink                      3. Reference                      4. URL                      5. None of these

**15. The \_\_\_\_\_ of software contains lists of commands and options.**

1. Title bar                      2. Menu bar                      3. Formula bar                      4. Tool bar                      5. None of these

**ANS:1. 2 2. 3 3. 1 4. 5 5. 5 6. 2 7. 3 8. 1 9. 3 10. 3 11. 1 12. 1 13. 4 14. 2 15. 2**

**1. Commands at the top of a screen such as FILE-EDIT-FONT-TOOLS to operate and change things within programs is**

1. Menu bar      2. Tool bar      3. User-friendly      4. Word processor      5. None of these

**2. When you are selecting a mouse for a particular computer system, what is the most important consideration?**

1. The type of drivers that come with the mouse      2. The length of the mouse cord  
3. The type of connector the mouse is equipped with      4. The number of buttons the mouse has      5. None

**3. How is it possible that both programs and data can be stored on the same floppy disk?**

1. A floppy disk has two sides, one for data and one for programs.  
2. Programs and data are both software, and both can be stored on any memory device.  
3. A floppy disk has to be formatted for one or for the other.  
4. Floppy disks can only store data, not programs.      5. None of the above

**4. Numbers in table columns are usually**

1. Right-aligned      2. Left-aligned      3. Justified      4. Centered      5. None of these

**5. A \_\_\_\_\_ is a unique name that you give to a file of information.**

1. Folder      2. File name      3. File name extension      4. Device letter      5. None of these

**6. Computer program allowing higher-level computer programs to interact with a hardware device is known as**

1. Device driver      2. Software driver      3. Hardware driver      4. Both a and b      5. None of these

**7. What is meant by a dedicated computer?**

1. Which is used by one person only      2. Which is assigned one and only one task  
3. Which uses one kind of software      4. Which is meant or application software      5. None of these

**8. The system unit of a personal computer typically contains all of the following except**

1. Microprocessor      2. Disk controller      3. Serial interface      4. Modem      5. None of these

**9. In most IBM PCs, the CPU, the device drives, memory expansion slots and active components are mounted on a single board. What is the name of this board?**

1. Motherboard      2. Breadboard      3. Daughter board      4. Grandmother board      5. None of these

**10. Umbrella term covering some of Microsoft's legal mechanisms for software source code distribution.**

1. Shared source      2. Shared software      3. Licensed software      4. Freeware Software      5. None of these

**11. Perforated paper used as input of output media is known as**

1. Paper tape      2. Magnetic tape      3. Punched papers tape      4. Card punch      5. None of these

**12. Which is considered a direct entry input device?**

1. Optical scanner      2. Mouse and digitizer      3. Light pen      4. All of the above      5. None of these

**13. Which is used for manufacturing chips?**

1. Bus      2. Control unit      3. Semiconductors      4. Both a and b      5. None of these

**14. What is the term used or internet radio?**

1. Slacker      2. Drive      3. iPod      4. Android      5. None of these

**15. An encryption system in which the sender and receiver of a message share a single common key that is used to encrypt and decrypt the message is known as**

1. Thread bump      2. secret-key cryptography      3. Cloud storage      4. Bootstrap      5. None of these

1. 1      2. 3      3. 2      4. 1      5. 2      6. 1      7. 2      8. 4      9. 1      10. 1      11. 1      12. 4      13. 3      14. 1      15. 2

1. \_\_\_\_ gives a computer its unique address across the network.

1. System Address    2. SYSID    3. Process ID    4. IP Address    5. CPU Address

2. A database management system based on the concept of ownership:

1. Network topology    2. Network layer    3. Network database system    4. Network license system    5. None

3. Which functional component of a computer is responsible for the computing?

1. Input    2. Output    3. CPU    4. Memory    5. Storage

4. Which of the following computer terms is used to describe the number of bits that a CPU accessed at one time?

1. Nibble    2. Word    3. Byte    4. Character    5. Bit

5. What characteristic of RAM memory makes it not suitable for permanent storage?

1. Too slow    2. Unreliable    3. It is volatile    4. Too bulky    5. All the above

6. COBOL is used in \_\_\_\_ applications.

1. Commercial    2. Scientific    3. Space    4. Mathematical    5. Algorithms

7. What altering of data so that it is NOT usable unless the changes are done is called?

1. Biometrics    2. Compression    3. Encryption    4. Ergonomics    5. None of these

8. What is the shortcut for 'find and replace' dialogue box?

1. Ctrl + F    2. Ctrl + R    3. Ctrl + H    4. Ctrl + M    5. Ctrl + D

9. Search menu is available at which of the following buttons?

1. End    2. Start    3. Turn off    4. Restart    5. Reboot

10. Which of the following is a section of the CPU that is responsible for performing mathematical operations?

1. Memory    2. Register Unit    3. Control Unit    4. ALU    5. CPU

11. Identify the IP address from the following:

1. 300.215.317.3    2. 302.215@417.5    3. 202.50.20.148    4. 202-50-20-148    5. 101.50. 2 0.148

12. Memories which can be read only are called \_\_\_\_ memories.

1. RAM    2. Secondary Memory    3. EERAM    4. Dynamic Memories    5. ROM

13. What is the another name of endless loop?

1. Data traffic pattern    2. Data loop    3. Infinite loop    4. Feedback loop    5. Slot

14. A single packet on a data link is known as \_\_\_\_

1. Path    2. Frame    3. Block    4. Group    5. None of these

15. The microcomputer, Intel MCS-80 is based on the widely used Intel \_\_\_\_

1. 8080 microprocessor    2. 8085 microprocessor    3. 8086 microprocessor    4. 8082 microprocessor

16. A/An \_\_\_\_\_ device is any device that provides information which is sent to the CPU.

1. Input    2. Output    3. CPU    4. Memory    5. None of these

17. The storage subsystem in a microcomputer consists mainly of \_\_\_\_\_ Media with varying capacities.

1. Memory or video    2. Magnetic or optical    3. Optical or memory    4. Video or memory    5. None of these

1. 4    2. 3    3. 3    4. 2    5. 3    6. 1    7. 3    8. 1    9. 2    10. 4    11. 3    12. 5    13. 3    14. 2

15. 1    16. 1    17. 2

**1. Any storage device added to a computer beyond the immediately usable main storage is known as:**

1. Floppy disk      2. Hard disk      3. Backing store      4. Punched card      5. None of these

**2. Which output device is used for translating information from a computer into pictorial form on paper?**

1. Mouse      2. Plotter      3. Touch panel      4. Card punch      5. None of these

**3. Which type of system puts the user into direct conversation with the computer through a keyboard?**

1. Real time processing      2. Interactive computer      3. Batch processing      4. Time sharing      5. None of these

**4. The list of coded instructions is called:**

1. Computer program      2. Algorithm      3. Flowchart      4. Utility programs      5. None of these

**5. A section of code to which control is transferred when a processor is interrupted is known as \_\_\_\_**

1. M      2. SVC      3. IP      4. MDR      5. None of these

**6. By default, your documents print in \_\_\_\_\_ mode.**

1. Landscape      2. Portrait      3. Page Setup      4. Print View      5. None of these

**7. What are .bas, .doc and .htm examples of ?**

1. Extensions      2. Domains      3. Protocols      4. Database      5. None of these

**8. Ctrl, Shift and Alt are called \_\_\_\_\_ keys.**

1. Adjustment      2. Function      3. Modifier      4. Alphanumeric      5. None of these

**9. Data (information) is stored in computers as**

1. Files      2. Directories      3. Floppies      4. Matter      5. None of these

**10. The process of writing out computer instructions is known as**

1. Assembling      2. Compiling      3. Executing      4. Coding      5. None of these

**11. Specialised programs that assist users in locating information on the Web are called**

1. Information engines      2. Search engines      3. Web browsers      4. Resource locators      5. None of these

**12. The first page of a Web site is called the**

1. Homepage      2. Index      3. Java Script      4. Book mark      5. None of these

**13. A word in a web page that, when clicked, opens another document**

1. Anchor      2. URL      3. Hyperlink      4. Reference      5. None of these

**14. What disk is used to cold boot a PC?**

1. Setup disk      2. System disk      3. Diagnostic disk      4. Program disk      5. None of these

**15. The \_\_\_\_\_ tells the computer how to use its components.**

1. Utility      2. Network      3. Operating system      4. Application program      5. None of these

**16. The software component of an expert system that draws conclusions is the \_\_\_\_ ?**

1. Inference engine      2. Hypertext      3. Multiplexer      4. Virtual storage      5. Integrity

**17. Which of the following options is not a JSP implicit object ?**

1. Page      2. Request      3. Session      4. In      5. None of these

**1. 2      2. 2      3. 2      4. 1      5. 1      6. 2      7. 1      8. 3      9. 1      10. 4      11. 3      12. 1      13. 3      14. 2      15. 3  
16. 1      17. 4**

**1. A \_\_\_\_\_ contains specific rules and words that express the logical steps of an algorithm.**

1. programming language 2. syntax 3. programming structure 4. logic chart 5. None of these

**2. The simultaneous processing of two or more programs by multiple processors is**

1. Multiprogramming 2. Multitasking 3. Time-sharing 4. Multiprocessing 5. None of these

**3. Computers use the \_\_\_\_\_ number system to store data and perform calculations.**

1. Binary 2. Octal 3. Decimal 4. Hexadecimal 5. None of these

**4. \_\_\_\_\_ is the process of carrying commands.**

1. Fetching 2. Storing 3. Executing 4. Decoding 5. None of these

**5. Softcopy is a intangible output, so then what is hardcopy?**

1. The physical parts of the computer 2. The printed parts of the computer  
3. The printed output 4. The physical output devices 5. None of these

**6. A/an \_\_\_\_\_ is a program that makes the computer easier to use.**

1. Utility 2. Application 3. Operating system 4. Net work 5. None of these

**7. An error in a computer program is-**

1. Crash 2. Power Failure 3. Bug 4. Virus 5. None of these

**8. A set of instructions telling the computer what to do is called**

1. Mentor 2. Instructor 3. Compiler 4. Program 5. None of these

**9. What is backup?**

1. Adding more components to your network  
2. Protecting data by copying it from the original source to a different destination  
3. Filtering old data from the new data 4. Accessing data on tape 5. None of these

**10. The term 'bit' is short for**

1. Megabyte 2. Binary language 3. Binary digit 4. Binary number 5. None of these

**11. When sending e-mail, the \_\_\_\_\_ line describes the address of primary recipient.**

1. Subject 2. To 3. CC 4. BCC 5. Header

**12. Secondary storage of a computer is also known as \_\_\_\_\_ storage.**

1. Another 2. Unlimited 3. Volatile 4. Auxiliary 5. None of these

**13. \_\_\_\_\_ SQL command is used to append the record.**

1. SELECT 2. INSERT 3. UPDATE 4. CREATE 5. ALTER

**14. Part of a computer instruction word that designates the function performed by a specific instruction:**

1. Operand 2. Unicode 3. Gray code 4. Opcode 5. Excess-3 code

**15. The ability to easily add additional users means that a network is**

1. Scalable 2. Dedicated 3. Decentralized 4. Secure 5. None of these

**16. In a database, a field is a**

1. label 2. table of information 3. group of related records 4. category of information 5. None of these

**1. 1 2. 4 3. 1 4. 3 5. 3 6. 3 7. 3 8. 4 9. 2 10. 3 11. 2 12. 4 13. 2 14. 4  
15. 1 16. 3**

**1. In a Batch Processing Operating System, interaction between the user and the processor is**

1. Limited
2. Not possible
3. Unlimited
4. Depends upon user only
5. Depends upon amount of work

**2. In case of computer, "JUMPER" is**

1. Used to configure the hard disk
2. Used to configure the primary memory
3. Used to play computer game
4. A software language
5. A machine language

**3. A small or intelligent device is so called because it contains within it a**

1. Computer
2. Microcomputer
3. Programmable data
4. Sensor
5. None of these

**4. Which technology is used in compact disks?**

1. Mechanical
2. Electrical
3. Electromagnetic
4. Laser
5. None of these

**5. The process that rearranges file fragments into contiguous files is called**

1. File filing
2. Folder folding
3. Unfragging
4. Defragmentation
5. File folding

**6. \_\_\_\_\_ virus describes the awful consequences of not acting immediately.**

1. Android
2. Spoofing
3. Phishing
4. Misleading e-mail
5. Sabotage

**7. \_\_\_\_\_ operating systems are found on ROM chips in portable or dedicated devices.**

1. Server
2. Network
3. Embedded
4. Stand-alone
5. Windows

**8. Identify the odd term among the following groups.**

1. Optical fibre
2. Co-axial cable
3. Twisted pair wire
4. Micro waves
5. None of these

**9. POP (Post Office Protocol) is used for**

1. Accepting e-mail
2. Accessing any e-mail
3. Creating e-mail
4. Transferring e-mail
5. None of these

**10. The full form of COBOL is**

1. Common Business Oriented Language
2. Common Bright Oriented Language
3. Co-axis Business Oriented Language
4. Common Logic Oriented Language
5. None of these

**11. Which of the following is to be used when you want to make all letters capital without using the shift key for each character?**

1. Shifter
2. Upper case
3. Caps lock key
4. Icon
5. None of these

**12. Which of the following is a device that reads the information contained on a disk and transfers it to the computer's memory?**

1. Monitor
2. Screen
3. Keyboard
4. Disk drive
5. None of these

**13. Which view in PowerPoint can be used to enter speaker's comments?**

1. Normal
2. Slide show
3. Slide sorter
4. Notes page view
5. None of these

**14. The boxes that are displayed to indicate that the text pictures or objects are placed in it is called**

1. Placeholder
2. Auto text
3. Text box
4. Word art
5. None of these

**15. When you select a mouse for a particular computer system, what is the most important consideration?**

1. The type of drivers that come with the mouse
2. The length of the mouse cord
3. The type of connector the mouse is equipped with
4. The number of buttons the mouse has
5. None of these

**1. 1    2. 1    3. 4    4. 4    5. 4    6. 4    7. 3    8. 4    9. 2    10. 1    11. 3    12. 4    13. 4    14. 1    15. 3**

**1. The smallest memory size is?**

1. Byte                      2. GigaByte                      3. KiloByte                      4. MegaByte                      5. None of these

**2. Android Operating system is an example of which kind of Source Model?**

1. Open Source                      2. Vertical Market Software                      3. Horizontal Market Software                      4. Shareware

**3. Which process checks to ensure the components of the computer and operating are connected properly?**

1. Booting                      2. Processing                      3. Editing                      4. Saving                      5. None of these

**4. Codes consisting of lines of varying widths or lengths that are computer-readable are known as?**

1. An ASCII code                      2. An OCR scanner                      3. A magnetic tape                      4. A bar code                      5. None of these

**5. What is the ultimate purpose of Defragmentation?**

1. Make the PC faster                      2. Create More Free Space                      3. Delete temporary files  
4. Reduce Power consumption                      5. None of these

**6. Which input device cannot be used to work in MS Office?**

1. Scanner                      2. Mouse                      3. Keyboard                      4. Joy stick                      5. Light pen

**7. Storage that retains its data after the power is turned off is referred to as?**

1. Volatile storage                      2. Sequential storage                      3. Non-volatile storage                      4. Direct storage                      5. None of these

**8. Accessing data on tapes is much \_\_\_\_\_ than that accessing data on disks?**

1. Same                      2. Faster                      3. Slower                      4. All of the above                      5. None of these

**9. IP-Address 192.5.48.3 belongs to-**

1. Class A                      2. Class B                      3. Class C                      4. Class D                      5. None of these

**10. Which type of web document is run at the client site?**

1. Static                      2. Dynamic                      3. Active                      4. All of the above                      5. None of these

**11. Which of the following is an acronym for Electronic Delay Storage Automatic Calculator?**

1. UNIVAC                      2. EDSAC                      3. EDVAC                      4. Abacus                      5. None of these

**12. When data changes in multiple lists and all lists are not updated, this causes**

1. data redundancy                      2. information overload                      3. duplicate data                      4. data inconsistency                      5. None of these

**13. \_\_\_\_\_ are words that a programming language has set aside for its own use.**

1. Control words                      2. Reserved words                      3. Control structures                      4. Reserved keys                      5. None of these

**14. A good practice, before installing software on the Windows XP operating system, is to establish a(n) \_\_\_\_\_ so that if anything goes wrong during installation you can restore your system back to how it was before you started.**

1. backup                      2. image                      3. restore point                      4. upgrade                      5. None of these

**15. To resolve problems with Microsoft products, check the \_\_\_\_\_, an online collection of more than 250,000 articles written by Microsoft support professionals.**

1. FAQs                      2. Knowledge Base                      3. integrated help                      4. Manual                      5. None of these

**16. Under which case will intranet be an effective networking tool?**

1. In a distributed decision-making environment                      2. Where heterogeneous applications are involved  
3. In a centralised organization                      4. In a decentralised organization                      5. None of these

**1. 1    2. 1    3. 1    4. 4    5. 2    6. 4    7. 3    8. 3    9. 3    10. 1    11. 2    12. 4    13. 2    14. 3    15. 2    16. 3**

**1. Retail employees typically use \_\_\_\_\_ terminals to process sales transactions.**

1. Point of sale      2. Transaction point      3. Automatic teller      4. Sales processing      5. None of these

**2. The simultaneous processing of two or more programs by multiple processors is \_\_\_\_\_**

1. Multiprogramming      2. Multiprocessing      3. Time-sharing      4. Multitasking      5. None of these

**3. The \_\_\_ folder retains copies of messages that you have started but are not yet ready to send.**

1. Drafts      2. Sent Items      3. Address Book      4. Outbox      5. None of these

**4. Inheritance is the ability of an object to pass on its characteristics to its \_\_\_\_\_.**

1. Subclasses      2. off-spring      3. Super classes      4. Parents      5. None of these

**5. Which of the following is used for close a tab on a browser?**

1. Ctrl + T      2. Ctrl + Y      3. Ctrl + A      4. Ctrl + W      5. None of these

**6. A program that converts high level language to machine Language is \_\_\_\_\_**

1. Linker      2. Assembler      3. Compiler      4. All of the above      5. None of these

**7. At a time how many operating system can be at work on a computer?**

1. Only one      2. Two      3. Three      4. Four      5. None of these

**8. A computer that combines the characteristic of analog and digital computers \_\_\_\_\_**

1. Hybrid Computer      2. Analog Computer      3. Digital Computer      4. Super Computer      5. None of these

**9. The technique that extends storage capacities of main memory beyond the actual size of the main memory is called \_\_\_\_\_**

1. Multitasking      2. Switching      3. Multiprocessing      4. Multiprogramming      5. Virtual storage

**10. The maximum Zoom percentage in MS WORD is \_\_\_\_\_**

1. 100%      2. 200%      3. 400%      4. 500%      5. None of these

**11. Memory unit is one part of -**

1. Server      2. Special function card      3. Peripheral device      4. Source code      5. Central Processing unit

**12. The main memory works in conjunction with -**

1. ROM      2. RAM      3. ALU      4. Sodium oxide      5. None of these

**13. What menu is selected to cut, copy and paste ?**

1. Edit      2. Layout      3. Type      4. View      5. None of these

**14. How many options does a binary choice offer ?**

1. None      2. One      3. Two      4. Three      5. Four

**15. A record is related to a file as a statement is related to a-**

1. Clipart      2. Program      3. Record      4. Software      5. None of these
